Kremmling Field Office  
P.O. Box 68  
Kremmling, CO 80459**

## **DOCUMENTATION OF LAND USE PLAN CONFORMANCE AND NEPA ADEQUACY**

NUMBER: CO-120-2007-48-DNA

PROJECT NAME: November 2007 Oil and Gas Lease Sale

LEGAL DESCRIPTION: See Attached

APPLICANT: Bureau of Land Management, Kremmling Field Office

DESCRIPTION OF PROPOSED ACTION: The proposal is to offer for lease 65 parcels, totaling approximately 102,470 acres of Federal minerals, for potential oil and gas exploration and production, located in Grand and Jackson County, Colorado. There are approximately 71,456 acres of BLM owned surface and minerals, 23,957 acres of private owned surface with Federal minerals, 6,961 acres of State-owned surface with Federal minerals, and six acres of National Recreation Area owned surface and federal minerals.

Legal descriptions and stipulations are included in Attachment #1.

LAND USE PLAN (LUP) CONFORMANCE REVIEW: The Proposed Action is subject to the following plan:

Name of Plan: Kremmling Resource Management Plan (RMP), Record of Decision (ROD)

Date Approved: December 19, 1984; Updated February 1999

\_\_X\_\_ The Proposed Action is in conformance with the LUP because it is specifically provided for in the following LUP decision(s):

Decision Language: "Federal mineral estates will remain open to oil & gas leasing under the Mineral Leasing Act of 1920 except for 1,351 acres which are withdrawn. Some lands are specifically encumbered with surface use restrictions."

## REVIEW OF EXISTING NEPA DOCUMENTS:

List by name and date all existing NEPA documents that cover the Proposed Action.

LUP: Kremmling Resource Area, Resource Management Plan(RMP)/EIS and Record of Decision (ROD)

Date Approved: December 19, 1984

LUP Amendment: Colorado Oil and Gas Leasing & Development Final EIS/Plan Amendment/Kremmling RMP/ROD

Date Approved: November 5, 1991

1). Is the Proposed Action substantially the same action and at the site specifically analyzed in an existing document?

Yes, the lands involved in this lease offering were analyzed in the *Colorado Oil and Gas Leasing & Development Final EIS Plan Amendment* (Oil and Gas Leasing EIS) and *Kremmling Resource Management Plan Record of Decision*, and a decision was made to make the lands available for lease. The action in this DNA is the same as proposed in that RMP. The RMP decisions were to make Federal oil and gas resources available for leasing with standard stipulations or, where necessary, special stipulations.

According to the Tenth Circuit Court of Appeals, site specific NEPA analysis is not possible absent concrete proposals. Filing of an Application for Permit to Drill is the first useful point at which a site specific environmental appraisal can be undertaken. (Park County Resource Council, Inc. v. U.S. Department of Agriculture, 10<sup>th</sup> Cir., April 17, 1987). In addition, the Interior Board of Land Appeals has decided that BLM is not required to undertake a site-specific environmental review prior to issuing an oil and gas lease when it previously analyzed the environmental consequences of leasing the land.... (Colorado Environmental Coalition Et AL., IBLA 96-243, decided June 10, 1999).

2). Was a reasonable range of alternatives to the Proposed Action analyzed in the existing NEPA document(s), and does that range and analysis appropriately consider current environmental concerns, interests, and resource values?

Yes, the alternatives analyzed in the RMP included Continuation of Present Management, Standard Terms and Conditions, and the Proposed Action. They provided a broad range of alternatives which, in our judgment, adequately address current environmental concerns, interests, and resource values.

3). Does the information or circumstances upon which the existing NEPA document(s) are based remain valid and germane to the Proposed Action? Is the analysis still valid in light of new studies or resource assessment information?

There is new information and circumstances which the existing NEPA documents (i.e. RMP/EIS and Oil and Gas (O&G) Leasing and Development EIS) did not adequately analyze.

The BLM recently completed its Wild and Scenic Eligibility Study in accordance with Section 5 (d) 1 of the Wild and Scenic Rivers Act. Portions of the Colorado River and Kinney Creek were found to be eligible for Outstanding Remarkable Values (ORVs). River segments determined to be eligible are afforded interim protective management until a suitability study is completed. Portions of parcel #s 4246, 4249, 4235, 4272, 4276, and 4260 are adjacent to these eligible river segments. Thus, in order to afford adequate protection to the ORVs, the BLM is deferring portions of these parcels (see Attachment #1 for legal descriptions).

The BLM issued a temporary road closure to motorized travel for the BLM-administered public land within parcel #4125, in accordance with title 43, CFR, Section 9268.3(d) (1) Closure of Lands (i) (ii) (iii) (iv) (v), on September 13, 2006. The closure was implemented due to a recent inventory in the area which indicated at least 12 miles of user-created routes that were known to be causing resource damage and providing motorized access into areas where motorized use is strictly prohibited in the Troublesome Wilderness Study Area (WSA). The temporary closure will remain in effect until future travel management designations are made in the area in conjunction with the Kremmling RMP revision. Thus, the BLM is deferring parcel # 4125.

The BLM will begin developing management alternatives to amend the 1984 Kremmling Resource Management Plan (RMP) this fall. The management alternatives will analyze impacts to wildlife, including sage-grouse. The BLM is aware of recent information discussing the effectiveness of sage-grouse habitat protection and mitigation measures. The BLM also received recommendations from the Colorado Division of Wildlife (CDOW) regarding sage-grouse habitat protection. As a result, the BLM is deferring portions of specific parcels within sage-grouse habitat. As BLM develops management alternatives, further consultation will be needed with stakeholders and other agencies (i.e. CDOW) to ensure consistency, analyze future management options, and ensure the effectiveness of mitigation measures (See Attachment #1 for legal descriptions and stipulations).

Based upon a review of new information regarding riparian and wetland values, Controlled Surface Use Stipulation [CO-28] for the protection of perennial water impoundments and streams, and/or riparian/wetland vegetation zones was added to specific parcels. The analysis contained in the Oil and Gas Leasing EIS provided an exception which allowed these stipulations to be added. Based upon this new information, and in order to complete further analysis during the RMP revision, the BLM is also deferring portions of parcel #s 4199, 4202, 4205, and 4330 surrounding Walden Reservoir and portions of parcel 4288 surrounding MacFarland Reservoir (See Attachment #1 for legal descriptions and stipulations).

4). Does the methodology and analytical approach used in the existing NEPA document(s) continue to be appropriate for the Proposed Action?

Yes, the methodology and analytical approach used in the Kremmling RMP and associated documents are appropriate. The use of new methodologies or approaches would result in the same impact conclusion and leasing decisions.

5). Are the direct and indirect impacts that would result from implementation of the Proposed Action unchanged from those analyzed in the existing NEPA document?

Yes, the direct and indirect impacts of the current proposed action are substantially unchanged from those identified in the Kremmling RMP and associated documents.

(See also 1. above.)

6). Are the cumulative impacts that would result from implementation of the Proposed Action unchanged from those analyzed in the existing NEPA document(s)?

Yes, the cumulative impacts remain substantially unchanged from those described in the Kremmling RMP and associated documents. Implementing the Proposed Action would not substantially change the cumulative impact analysis.

7). Is the public involvement and interagency review associated with the existing NEPA document(s) adequate for the Proposed Action?

Yes, the Kremmling RMP and associated documents were scrutinized by the public and other agencies. There have been no additional issues or concerns presented in the vicinity of most parcels since 1991 that would warrant reconsideration of leasing decisions, except those parcels the BLM is deferring.

INTERDISCIPLINARY REVIEW:

<b>Name</b>	<b>Title</b>	<b>Area of Responsibility</b>	<b>Date Review Completed</b>
Susan Cassel	Realty Specialist	Realty, Stipulations	7/30/07
Joe Stout	Planning & Environmental Coord.	NEPA	8/13/07
Paula Belcher	Hydrologist	Soil, Air & Water	8/6/07
Chuck Cesar	Wildlife Biologist	T&E, Wildlife	8/3/07
Kelly Hodgson	Natural Res. Spec.	Minerals	8/6/07
Justin Koppa	GIS Specialist	GIS	8/6/07
Bill B. Wyatt	Archaeologist	Cultural Resources and Native American Consultation	7/30/07

REMARKS:

Cultural Resources: Site specific surveys, evaluation and mitigation would be completed prior to the issuance of any permit.

Native American Religious Concerns: Tribal consultation was initiated on July 17, 2007, on the Proposed Action. Additional tribal consultation would occur for site specific consultation prior to the issuance of any permit action.

PERSONS / AGENCIES CONSULTED: Colorado Division of Wildlife, Colorado State Land Board, Grand and Jackson Counties

## **CONCLUSION**

**CO-120-2007-48-DNA**

Based on the review documented above, I conclude that this proposal conforms to the land use plan and that the NEPA documentation previously prepared fully covers the Proposed Action and constitutes BLM's compliance with the requirements of NEPA.

SIGNATURE OF RESPONSIBLE OFFICIAL: /s/ David Stout

DATE SIGNED: 8/13/07

Note: The signed Conclusion on this worksheet is part of an interim step in the BLM's internal decision process and does not constitute an appealable decision.
